

# Capabilities

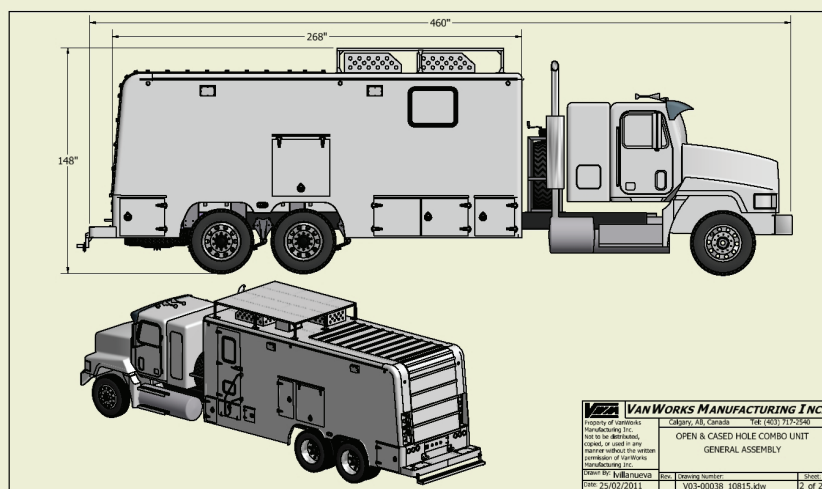

## Full Service Fabrication Facility

Whatever your requirements are we can help. No matter what is required we have the skills to complete the task. We are a FULL service fabrication facility from design and engineering through fabrication including MECHANICAL, ELECTRICAL, and HYDRAULICS. Our speciality is the design and fabrication of complete oilfield wireline units. We have the skills to handle your fabrication requirements start to finish.

Capabilities

## Highlights

- > 9,500 square feet of fabrication space
- > Brake, 200 ton, 10 foot bed
- > Shear, 160 ton, 10 foot bed
- > Iron Worker, 7 ton
- > Welding services including ARC, MIG, TIG
- > Specializing in aluminum fabrication
- > Mechanical and hydraulic services
- > Electrical services
- > Sheet metal services
- > 3D CAD Services, design and engineering of your projects
- > Support equipment including 8.5 ton crane and forklifts for handling of your projects in our facility

## Sampling of Units Built

- > Wireline Units
- > Aluminum Fabrication

- > Custom Shear & Brake Work
- > Custom Truck Decks

- > Crane Installations
- > Steel Fabrication, 650 amp MIG
